(54) METHOD FOR PRODUCING LEATHER-LIKE SHEET

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a leather-like sheet having excellent appearance, touch and physical properties, and provide a production method for the sheet using an aqueous dispersion of a polymer elastomer.

SOLUTION: The method for the production of the leather-like sheet comprises the impregnation of a sheet containing a polyester fiber as a main component with a liquid mixture of water-dispersible polymer elastomers containing a plurality of kinds of elastomers having different heat-sensitive gelling temperatures and the shrinking treatment of the sheet in a state that at least one kind of the water-dispersible polymer elastomer among plural kinds of elastomers is not in the gelled state.
